motif_clust7 − GO:BP
immune response
immune system process
defense response
defense response to symbiont
defense response to other organism
response to other organism
response to external biotic stimulus
response to biotic stimulus
biological process involved in interspecies interaction between organisms
response to external stimulus
regulation of immune system process
innate immune response
positive regulation of immune system process
response to cytokine
response to peptide
response to bacterium
regulation of defense response
regulation of response to external stimulus
regulation of immune response
inflammatory response
