C_TUNvDMSO − KEGG
Metabolic pathways
KEGG root term
Parkinson disease
Prion disease
Huntington disease
Protein processing in endoplasmic reticulum
Alzheimer disease
Oxidative phosphorylation
Amyotrophic lateral sclerosis
Pathways of neurodegeneration − multiple diseases
N−Glycan biosynthesis
Various types of N−glycan biosynthesis
Carbon metabolism
Diabetic cardiomyopathy
Glycolysis / Gluconeogenesis
Pyruvate metabolism
Citrate cycle (TCA cycle)
Chemical carcinogenesis − reactive oxygen species
Thermogenesis
Biosynthesis of amino acids
5.0
7.5
10.0
12.5
−log10(FDR−adjusted p−value)
Gene Count
500
1000
1500
