C_THAvDMSO − KEGG
Oxidative phosphorylation
Diabetic cardiomyopathy
Metabolic pathways
Huntington disease
Parkinson disease
Motor proteins
KEGG root term
Prion disease
Protein processing in endoplasmic reticulum
Alzheimer disease
Chemical carcinogenesis − reactive oxygen species
Pyruvate metabolism
Non−alcoholic fatty liver disease
Thermogenesis
Pathways of neurodegeneration − multiple diseases
Citrate cycle (TCA cycle)
Cardiac muscle contraction
Amyotrophic lateral sclerosis
Carbon metabolism
Various types of N−glycan biosynthesis
