H_TNFavH2O − GO:BP
immune system process
immune response
response to cytokine
response to peptide
response to other organism
response to external biotic stimulus
biological process involved in interspecies interaction between organisms
response to biotic stimulus
response to bacterium
defense response to symbiont
defense response to other organism
regulation of immune system process
defense response
cellular response to cytokine stimulus
inflammatory response
response to molecule of bacterial origin
positive regulation of immune system process
innate immune response
canonical NF−kappaB signal transduction
response to external stimulus
