H_LPSvH2O − GO:BP
viral RNA genome replication
single stranded viral RNA replication via double stranded DNA intermediate
regulation of single stranded viral RNA replication via double stranded DNA intermediate
regulation of positive chemotaxis
regulation of neutrophil chemotaxis
regulation of entry of bacterium into host cell
regulation of cell adhesion molecule production
positive regulation of positive chemotaxis
positive regulation of neutrophil migration
positive regulation of neutrophil chemotaxis
positive regulation of granulocyte chemotaxis
neutrophil activation
negative regulation of cell adhesion molecule production
modulation by symbiont of entry into host
induction of positive chemotaxis
granulocyte activation
entry of bacterium into host cell
embryonic digestive tract development
cell adhesion molecule production
antimicrobial humoral immune response mediated by antimicrobial peptide
