C_TNFavH2O − GO:BP
immune system process
immune response
defense response
regulation of immune system process
response to external stimulus
response to other organism
response to external biotic stimulus
response to biotic stimulus
biological process involved in interspecies interaction between organisms
positive regulation of immune system process
inflammatory response
regulation of response to external stimulus
defense response to other organism
response to cytokine
cell activation
response to peptide
defense response to symbiont
leukocyte activation
response to bacterium
regulation of cytokine production
