C_TUNvDMSO − GO:BP
energy derivation by oxidation of organic compounds
biological_process
generation of precursor metabolites and energy
carbohydrate derivative biosynthetic process
respiratory electron transport chain
electron transport chain
carbohydrate derivative metabolic process
aerobic respiration
oxidative phosphorylation
mitochondrial ATP synthesis coupled electron transport
ATP synthesis coupled electron transport
glycoprotein biosynthetic process
cellular process
cellular respiration
ATP metabolic process
glycoprotein metabolic process
protein N−linked glycosylation
aerobic electron transport chain
nucleoside phosphate metabolic process
endoplasmic reticulum unfolded protein response
