H_TUNvDMSO − KEGG
Prion disease
Huntington disease
Parkinson disease
Protein processing in endoplasmic reticulum
Alzheimer disease
Amyotrophic lateral sclerosis
Oxidative phosphorylation
Pathways of neurodegeneration − multiple diseases
KEGG root term
Metabolic pathways
Diabetic cardiomyopathy
Biosynthesis of amino acids
Carbon metabolism
Chemical carcinogenesis − reactive oxygen species
Citrate cycle (TCA cycle)
Non−alcoholic fatty liver disease
Thermogenesis
N−Glycan biosynthesis
Glycolysis / Gluconeogenesis
Various types of N−glycan biosynthesis
